Return of Heavy Operators to Wall Street and Consequent Rise in Prices.

SHORTS NIPPED BY FROST

LONDON TAKES ADVANTAGE OF THE RISE.

New York, Dec. 2.-The price move ment of stocks underwent some violent changes today and the course of the market gave abundant evidence of the revival of something like animation in the speculation. The supposition of reentry into active participation in the speculation of some of the professional speculation of some of the professional operators of large calibre was confirmed by the appearance of trading and the signs of boldness and resourcefulness with which it was conducted. The softness of the early market and the readiness of the early market and the readiness with which it yielded to selling pressure conveyed the impression that the active campaign for a rise, which had been entered upon last week, had been quickly abandoned in face of some features developed over the end of the week, which were regarded as rather discouraging. The pronounced turn in the later market suggested a partly manipuweek, which were regarded as rather discouraging. The pronounced turn in the later market suggested a partly manipulative origin for the early relapse in the favorite manner of a veteran speculative leader who has been suspected of a prominent share in the initiation of the present movement.

Washington, Dec. 2.—Today's statement of the treasury balances in the general fund, exclusive of the \$150,000,000 gold reserve, shows: Available cash balance, \$250,551,014; gold coin and bullion, \$23,-917,898; gold certificates, \$71,582,660.

market was highly speculative throughout to a degree that has not been approached since the crisis in financial affairs. The reaction in the early dealings served to shake out the weak following of the bull leadership and to encourage renewed short selling by the bears, who had commenced to cover ex-tensively late last week in the uneasiness engendered by the aggressiveness of the advance. This shaking out of a weak bull following and the revival of a short interest strengthening the technical position of the market and facilitated the later advances. Boom traders held the belief the later advances bull the belief the later advances.

later advances.

Room traders held the belief that it was designed to the end. The renewal of the advance late in the day was assigned to the general purposes of a reorganized party in the speculation to take advantage of the turn towards improvement in the financial situation, which made itself clearly perceptible already last week. The market had the designation of political also from some observers, meaning that speculative anticipation was being made of future events at Washington and of an expected modification of the public sentiment of hostility towards capital and towards corporations throughout the country with its corresponding restriction in the trend of legislation and administrative acts.

ponding restriction in the trend of legislation and administrative acts.

It was alleged in behalf of this view that sufficient was known of the contents of the president's message to be prescuised to congress tomorrow to bear out this assumption of a modified view of corporation questions. While prices were declining in the morning, assertions were current with equal positiveness the market was discounting an expected bad influence on prices from the tenor of the presidential message. It was argued also that the pace set in the recovery last week had become far too rapid and the bankers and capitalists of power and influence were frowning upon the impetuosity of the movement.

osity of the movement.

Free selling for London account was a factor in the early reaction, foreigners taking advantage of the rapid advance in prices to take quick speculative profits. The stiffness of the money market with the continuance of the December settlements was another bridling influence. Payment was made of \$10,000,000 for subscriptions to new St. Paul stock. There was some recovery in the rate of the pro-

stocks, but were decidedly more active and showed a large adsorption. Total sales, par value, \$5,346,000.
United States 2s advanced 12 and the 3s 14 per cent in the bid prices.

### GRAIN AND PROVISIONS.

Chicago, Dec. 2.—The wheat market was weak throughout the day with the exception of a short period about the middle of the session, when buying by shorts, based on a rally in stocks, caused moderate strength for a short time. At the start the market was bearishly affected by easy cables and by weakness of the stock list. As the session advanced, absence of demand from export. Payment was made of \$10,000,000. There scriptions to new St. Paul stock. There was some recovery in the rate of the premium on currency also. This did not impair the feeling of confidence that events in the banking situation were moving rapidly towards a restoration of normal conditions. Not a little was heard while prices were declining, of the effects yet to be felt throughout the commercial fabric of the shock which the banking structure had been subjected to. The talk was silenced about the stock exchange during the buoyant rise late in the day.

In the day.

In the day casy capies and by casy capies and cast was weak and lower, also with case with spot quoted at 29,506,30,00.

Copper was lower in the English market was weak and lower at 13.50014.00; electrolytic at 1

and then declined to 1.62. The close was at 1.62½.

The corn market was strong almost all day because of an absence of any deliverles on December contracts, which induced considerable covering by shorts. An advance of ½@1 cent in the price of cash grain stimulated additional purchases of the options. The market late in the day was bearishly affected by the weakness of wheat, all of the early gains being lost on realizing sales. The close was easy May opened a shade to ¼@% lower at 555%@557%, advanced to 56½ and closed at 557%.

There was only a moderate trade in oats There was only a moderate trade in oats but the market was firm the greater part of the day, the strength of corn being the chief bullish influence. Deliveries of December contracts were estimated at 500,000 bushels. Country acceptances were light and the movement was again small. May opened a shade lower at 50%, advanced to 51% and closed at 51.

### BODY RACKED WITH PAIN

No other disease causes such wide-spread suffering as Rheumatism. It is a nerve racking torture, and so thoroughly does it dominate the system, when it becomes entrenched in the blood, that its victims are usually complete slaves to pain. Rheumatism is due to an excess of uric acid in the blood brought on by stomach troubles, weak kidneys, indigestion, and a sluggish condition of the system. The natural refuse of the body, instead of passing off through the ordinary channels of waste, is left to sour and ferment in the system because of these irregularities, forming uric acid which is absorbed into the blood, and Rheumatism gets a foothold. As the blood circulates through the body it deposits the acrid, irritating substances with which it is saturated, into the different muscles, nerves, tissues and bones. Sharp, biting pains commence, the flesh becomes feverish, swollen and tender, the muscles and joints throb and jerk, and the body is literally racked with pain. Plasters, blisters, liniments, etc., can never

cure the disease; they relieve the pain, perhaps, temporarily, but do not reach the trouble, which is in the blood. S. S. S. is the PURELY VEGETABLE

proper treatment for Rheumatism. It goes down and attacks the disease at its head, and by driving out the poison and acrid fluids which are causing the pain, and strengthening and enriching the blood, cures Rheuma-

lism permanently. S. S. S. is the greatest of all blood purifiers, just what is needed in every case of Rheumatism. Book on Rheumatism and any medical advice free. THE SWIFT SPECIFIC CO., ATLANTA, GA.

## Better

To live better and better seems to be the aim of every American family. The effort may be laudable it certainly is not easy. Hard as the game may be on the players, the coming of death or disaster makes it doubly strenuous. The least that a man so engrossed can do is to make sure that those with whom and for whom he is now spending all, are protected against the want and distress that would follow his death. The best way to ensure this is by means of a policy in
